MEMORANDUM FOR: Assistant Director, Central Reference

SUBJECT : Renaming of Composite Group

1. The term "Composite Group" gives users and potential users virtually no indication of the results that can be expected.
2. The term "Intellofax" is widely accepted, and its definition, including its limits as well as its strengths, is spreading through improved briefings and more precise usage in training courses and descriptive lectures.
3. It is recommended that the term "Composite Group" be discontinued, and that the combined effort to provide reference service from coded raw intelligence reports be known as the "Intellofax Reference Group."
